VERTEX TABLE 50×50 HPL

By Karim Rashid

VERTEX is a set of table and chairs with triangular planes which join dynamically together to create comfortable forms suitable for dining or meeting rooms, banquet or lecture halls and other casual needs. VERTEX looks as if it was chiseled from a single block of material, what remains is structural yet, beautiful. The VERTEX collection was created to integrate a more conceptual architectural piece into our space, to give it a more sophisticated touch.
